Electric to Air solenoid logs

Typical Air Log configurations

- Max input air pressure is 160 psi.
- An inline air filter is highly recommended.
- Do not energize the air valves for more than 1 – 2 minutes at a time. Overheating can occur.
- Input air fitting is (5/32" or 4mm) push lock.
- Outputs air fittings on top of each air valve are (5/32" or 4mm) push lock also.
